As a UNSW Foundation Studies student, I developed a deep connection with the inclusive, innovative, and welcoming environment that defines this unique academic community. During my time in the program, I have actively contributed to enhancing the student experience through leadership and engagement. Serving as a mentor and leader within the Peer Mentoring Program, I supported students by fostering connections, guiding them through transitions, and creating meaningful experiences. These contributions reflect my commitment to building a stronger, supportive community at UNSW.

Beyond my leadership and community engagement, I have consistently demonstrated excellence in academics, particularly in Science. My achievements include earning first place in the 2nd Yangtze River Delta Youth Artificial Intelligence Olympic Challenge and securing recognition at the 37th China Chemistry Olympiad. These honours highlight my ability to apply scientific knowledge creatively and collaboratively. Such experiences have prepared me to contribute meaningfully to UNSW's academic and research initiatives.

Receiving this scholarship would empower me to further my academic pursuits in Science and Artificial Intelligence, aligning with my vision to drive innovation and positive change in these fields. I am eager to continue contributing to UNSW's dynamic academic environment, both as a scholar and an engaged member of the university community.

Thank you again for considering my application. I look forward to the opportunity to further demonstrate my potential and make a lasting impact at UNSW Sydney.

Yours truly,

Jiarui Wang

A handwritten signature in black ink, reading "Jiarui Wang". The signature is written in a cursive, flowing style with a large, stylized 'W'.
